What Makes a Guitarist Happy?

It's finding an instrument that plays the way they play, and feels the way they want it to feel. An instrument such as this allows artists to express themselves freely. Yamaha constantly seeks out the best musicians in the world and invite them to talk about their instruments. What they like in a guitar and what they don't like. We ask them what could be done to improve on the instruments that they play. Then we go back and re-think our designs, fine tuning until it is just what the artist has in mind. Visit your Yamaha dealer today and try out one of our guitars. And be happy.

• Warmouth Neck & Sperzel Locking Pegs

The Pacifica 604W and 904 both feature top-quality Sperzel locking machines for precise and reliable tuning. The 904 additionally features an American-made Warmouth neck for clean, comfortable fingering. The neck also has a relatively thick heel for solid, full bodied sound.

• "Vintage Custom" Tremolo (904) Wilkinson VS100 Tremolo (604W)

The "Vintage Custom" tremolo system is a highly refined version of the traditional type tremolo featuring a two-point fulcrum. The Pacifica 904's tremolo is cast from solid steel for a refined sound with improved stability. The tremolo featured on the Pacifica 604W is a Wilkinson VS100 tremolo system made by Gotoh.

AEX/AES/SA

Yamaha incorporates a unique blend of tradition and technology to bring you the AEX 1500. Traditional arch top design with a floating

humbucker pickup, is combined with a our APX acoustic bridge pickup and custom electronics. The result, a guitar that brings the best of acoustic and electric together into a combination that offers a whole new range of sonic colors to the musician's tonal palette. Our AES line offers classic beauty and full-bodied tone with state-of-the-art technology and manufacturing. The semi-hollow body SA 2200 features Alnico pickups and individual coil splitters for added tonal versatility.

Violin Sunburst

- AEX Piezo Pickup**
 Mounted in the bone and ebony bridge, the Piezo pickup delivers full crisp acoustic sound. Highly responsive, even the subtlest picking and attack nuances will be reproduced accurately.
- AEX Floating Humbucker Pickup**
 The Mini Humbucker produces a warm and expressive sound that is full of range and depth. A floating mount is used to allow the top of the guitar to vibrate freely insuring excellent acoustic sound.
- AEX Controls**
 Pickup selection is made possible by a 3-way selector. Separate controls for the pickups

consist of a 3-band linear EQ with variable mid range (400Hz-2kHz) for the piezo pickup and a tone control for the humbucker. The 3-band EQ controls allow extensive tone control of the piezo pickup right at the playing position. There is also a MIX control which permits balance of the two pickups creating a broad range of sonic possibilities.

AEX Body Design

The superb sound of the AEX1500 comes from the use of acoustic guitar design throughout the body. Easier to hold and play, the slightly smaller design produces a full acoustic sound of unbelievable quality.

ATTITUDE

The Attitude line is the culmination of a rich collaboration between Billy Sheehan and Yamaha. The Limited II was designed jointly with virtuoso bassist Billy Sheehan. It possesses power and excitement that will thrust your imagination to the cutting edge. The recently released Plus line offers the power and performance demanded by today's progressive players.
